# SINCE 1988

OEM Manufacturing & Sales, LP is an ideal supplier for companies seeking to lower costs and consolidate their vendor base. We serve leading manufacturers and injection molders worldwide. Our success in manufacturing and materials management began with fasteners and has since expanded to include: inserts, springs, stampings, shafts, screw machine parts, wire forms, extrusions, die casts, cold-headed specials, sub-assemblies, bag kitting, and a variety of custom engineered metal, plastic and rubber components. Corporate headquarters and warehousing is strategically located in San Diego, California, with a full-time satellite office operating in China. Our ability to directly oversee factory procedures, including production and quality control, ensures we meet with optimal results every time.

Given OEM's diverse capabilities and expertise with both standard and custom components, partnering with us provides the value-added benefits of maintaining a single integrated supply chain. In addition to comprehensive service, we readily offer engineering and technical assistance aimed at cost reduction. Our award-winning Customer Service team will work with you to customize a stateside inventory management program that meets your delivery and/or stocking needs.

OEM's history of reliable performance and competitive pricing has earned us a world-class reputation. Our supplier awards not only set us apart but demonstrate the quality, service and support we provide our customers on a daily basis. With decades of experience working in the Pacific Rim, OEM offers the benefits of offshore manufacturing without the inconveniences. We invite your inquires and look forward to the opportunity of earning your business!

## OUR QUALITY

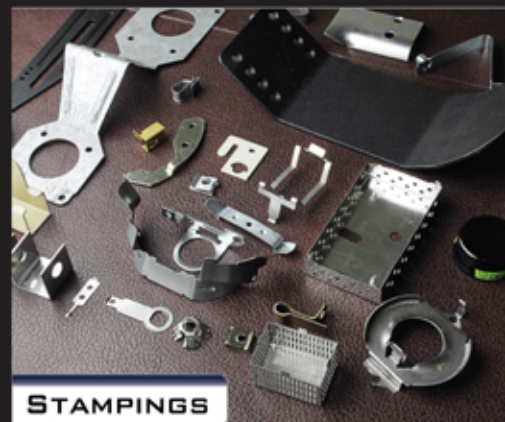

At OEM, we take great pride in our ability to consistently manufacture quality components. Our merited success is a direct reflection of the controls we have in place at every stage of production. Continuous improvement is pivotal to our performance. As a solutions-oriented supplier, OEM is committed to informed innovation, clear communication and the continuous education and training of all staff. Our mission is to help our customers minimize assembly costs without having to sacrifice quality and/or service.
